Taper's -

Portland - 9/28 Fall Protection. 9/28 First Aid. 9/30 Forklift. 9/30 Aerial Lift.

Safety Reset

As we start another season, take time to **reset, refocus, and recommit to safety.**

- **Wear Your PPE:** Hard hat, safety glasses, gloves, boots, and hearing protection as required.
- **Protect Against Falls:** Fall protection is required when exposed to a fall of **6 feet or more.**
- **Keep It Clean:** Clean as you go and keep walkways free of debris and trip hazards.
- **Use Tools Safely:** Inspect tools before use and only operate equipment you're trained to use.
- **Speak Up:** Correct or report unsafe conditions immediately.
- **Hazard Awareness:** Be aware of the things around you that could be dangerous and take immediate action to control the hazards.

Metal Stud Framing

Metal framing creates hazards from **sharp edges, flying debris, heavy material, and electricity.**

- **Protect Yourself:** Wear your cut-resistant gloves, cut sleeves, and ANSI Z87.1 safety glasses.
- **Keep Hands Clear:** Secure studs and track before cutting or fastening. Use clamps to hold your work.
- **Control Debris:** Clean up sharp scraps and metal shavings as you work.
- **Watch Electrical Hazards:** Metal conducts electricity. Protect cords from sharp edges and never run them over bottom track.
- **Store Material Safely:** Keep bundles of studs secure on a flat, dry surface.

Complete your PTP, identify hazards, and work the plan. Skilled Hands, Safe Plans.
